CUSTOMER OPENING CHECKLIST

BEFORE WE ARRIVE

- Empty your sump well 24 hrs prior to opening. (if applicable)
- Ensure power is turned on.
- Garden hose is accessible and turned on.
- Leave pool vacuum hose and head. (for circulation, vacuuming not included unless requested)
- Ensure your gate is unlocked, pets are secure in house and pet waste is cleaned up.
- Notify us 48 hours prior to your opening if there are any pool issues. (e.g. missing parts, plumbing, broken equipment)

AFTER OPENING

- Your water sample will be taken and tested. Balancing products may be added 24 hours after water has circulated.
- Reminder: In some instances the vacuum hose will be in your skimmer and garden hose left to fill pool. Please monitor your water level. Water should be turned off after level reaches 3/4 up your skimmer face plate. Please notify us in writing or email if you do not wish to have garden hose left on.

IMPORTANT INFO

- Debris will be bagged and left on site for you to dispose of.
- Lock beaded covers, DO NOT STORE DRY- Covers must be stored in a proper fill container with water. Add 1ltr of Dazzle Cover Cleanse to protect from mildew and odours.
- Do not turn on Salt Generators until water temperature range is above 70 (21 C) and water has been tested and balanced, and salt added.

IMPORTANT INFO

- Vacuuming the pool is not included unless requested when scheduling opening.
- Lighting of pool heaters requires a licensed gas TSSA technician. We will be happy to refer this service.
- We do not install or reset accessories with missing or broken parts (ladders, diving boards, etc. Or drop in steps or solar heat systems.
- If equipment is not in working order we will need to arrange a separate service call outside of the opening schedule.

You can pay for any of these services on-line.
Go to the Pool & Services section of our on-line store [HERE](#).

Thank You for Choosing "The Pool Place"
