

Cleaning Your Spa and Filter

Steps to Cleaning Your Spa

1. Remove Filter
2. Lower spa temperature to lowest point or shut down heater
3. Close jets (IMPORTANT!) Do Not Have Air Controls Open!
4. Put 150 ml of Whirl-O-Way in Spa
5. Turn pump on high for 10-15 minutes
6. Let the solution circulate throughout the spa
7. Drain the water from the spa
8. Rinse and wipe the spa (Spa Mitts are simple and effective)
9. Refill the spa with fresh water

Steps to Cleaning Your Filter

Remove and rinse your filter on your weekly maintenance day. Depending on the spa, use it as recommended to clean your spa filter thoroughly every 3-4 weeks.

1. Do not separate the pleats of your filter
2. Do not use a high pressure system or put your filters in dishwasher for cleaning
3. Fill a 5 Gallon pail or laundry tub with hot water
4. Add Mineraluxe Filter Revive to the water
5. Put the filter in the water and let it soak for a minimum of 6 – 12 hours
6. Rinse the filter
7. Let the filter dry, then replace in the spa

Cleaning Service

To make it easy for you, you can leave your filter with The Pool Place and we will perform a deluxe cleaning service.

Deluxe Filter Cleaning Service: \$20.00

The above information is general in nature. Always follow the manufacturer's advice on maintenance of your spa. If you have any questions, please do not hesitate to ask.
